MINE, MILL AND RAILROAD.

The coal trade, says the Philadelphia Record, has somewhat recovered from several days ago by the report that Coxe Bros. & Co. had announced a reduction of 40 cents per ton, and that other operators had promptly met the cut. Prices were stated yesterday to be more firm and steady, and dealers were reported to be making inquiries and

The coal trade generally does not take much stock in the rumors to the effect position. Barney J. Goodwin has been that Coxe Bros. & Co. are contemplating a sale of their interests to Jersey Central. A bit of unwritten history the Philadelphia Times printed because it has a bearing on this point is the fact that at the time of the McLeod coal combination negotiations for the sale on for some time and fell through. It was then proposed to divide up the property, Reading, Lehigh Vailey and Jersey Central each taking one-third, on the basis of \$12,000,000 for the whole. It failed, it is said, owing to the objection of President Maxwell, of Jersey Central, who thought the price was too high. It is understood that Coxe Bros. & Co. ask more for the property now than they did two years ago.

Saward doesn't think much of the Individual Operators' plan of battle to se-cure better tidewater rates. He regards it as "impossible that prices shall be higher than they are until there is more honesty of purpose on the part of the producers in carrying out an agreement. The market will take just about so much anthracite each year, and in order that this may be sold at a price which will be profitable to the producer and carrier it is necessary at times to restrict the production. It is an old story, that 'restriction' does not restrict; but this is only true where the took place, the Grangers, Sugar and parties in interest-some of them at | Manhattan being most conspicuous in least-apparently satisfied with the re- this rise. Following this there was a sults obtained, exceed what has been heavy selling movement in Northwes set down as their quota. A business of and Sugar. Northwest was depressed such magnitude as the anthracite coal to 97% from 98%. A cut in the price of trade, and which really is in such few hands as producers and carriers, should be better managed. It is only necessary | ing the price broke from 91% to 88%. to apply the rules of common prudence | Toward the close the market improves thereto, and the result would be a on statements by leading bankers that steady demand and a remunerative the new loan would be taken care of. This, at least, is easily said.

John Wanamaker, upon being asked as to the truth of the report that a number of Lehigh Valley stockholders to the withdrawals from the treasury. had inaugurated a movement to "run" him as a candidate for the presidency the lowest point of the day and the marof the company, replied: "It is news to ket closed steady in tone. Net changes me. I know absolutely nothing about any movement to place me at the head tive stocks. of the Lehigh Valley. I have not been conversation with people I have chanced to meet on the street, who have asked me why I did not be the conversation. asked me why I did not take hold of this or that or the other company. It is certainly a very remarkable thing that whenever any people get it into their heads that there ought to be a change in the management of any large corporation they at once pitch upon me as the man for the position, as though I had no business to attend to, no large interests to occupy my time and nothing to do but look after other people's

In reference to rumors as to the retirement of President Wilbur, of the Lehigh Valley, the Lehigh Valley official's announced that Mr. Wilbur has now no thought of retiring from his position at the head of the company. This is the truth, and it is not likely that there will be any change at the election in January. Mr. Wilbur has the support of the Packer estate, which gives him control of the company. A year or so ago he had serious thoughts of retiring, but it has been well known for months that he has given up all thoughts of resigning.

Says the Philadelphia Stockhol "The Scranton and Pittston Trac company, which has been opera only three and one-half miles of during the summer, to Taylor Greenwood, has just put in opera two additional miles, to Moosic, next week will begin operating Avoca, which is an additional miles. The contract has been give Stern & Silverman, of this city, to o plete the road into Pittston; this sec is now under construction, and wi completed next month, forming the necting link in a chain of electric ways in the Wyoming and Lackawa valleys comprising between ninety one hundred miles of track, and be ing into close comunication the merous towns and villages with city of Scranton-the third largest in Pennsylvania, and the metropol the anthracite coal region. All raily equal in merit to any of them."

He was taken with an attack of heart disease about a week ago, and at one time his life was despaired of, but he of the Coxe Bros, interests were carried rallied again and the physicians now have some hope for his recovery.

For the past few days the shops a Delano have been working full ten hours in every department. Just how long this order of things will continue is not known. Reliable information, however, is to the effect that there is enough work on hand to run the shops all winter on full time, without any more being received.

Washburn-Crosby Co. wish to assure their many pat-rons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop of miling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take no risks, and will allow the new wheat fully three months to mature before grinding.

This careful attention to every detail of milling has placed Washburn-Crosby Co.'s flour far above other
